

-6-

REMARKS

The Claims in the case are claims 22-32. Claim 22 corresponds in part to original claim 4; the definition of R¹ is taken from Claim 8; G is methylene, as in the examples; t is 2, as in the examples; R⁵ is taken from Claim 21; Q is taken from Claim 21; and Ar¹ and Ar² are defined by the definition of Ar¹ in Claim 21.

The dependent claim 23 corresponds to Claim 9, and Claims 24, and 25 are supported by the examples. Claims 26-30 correspond to Claims 12-16. No new matter has been added. Claims 31 and 32, newly added, claim the species listed in Table 3, the compounds 17 and 18.

The newly added claims avoid the rejections based on 35 USC 102(b). Applicants' G-R¹ side chain has no analogy to the art side chain of "p-fluorophenyl methylene". Reconsideration and withdrawal of the rejection based on the art is respectfully requested.

The rejection based on the first paragraph of 35 USC112 is also avoided by the newly added Claims. The examiner's comments about scope and enablement, together with the indication of allowable subject matter of Claims 4, 8, and 9, have resulted in the claim scope presented in claims 22-25. The variables in all Claims 22-30 are supported by Applicants' specification including many examples to the variable Q as claimed. Please note that the Tables of the examples relate to the piperidine ring having an "R" group: this group corresponds to the "Q" moiety of the Claims.

Reconsideration and allowance of the claims is respectfully requested.

Respectfully submitted,

/Hesna J. Pfeiffer/
